USERNAME:

PASSWORD:

Welcome to our Physicians' Portal. This HIPAA compliant, secure site enables referring physicians to view their patients' images and reports.

Initially, physicians will be assigned a "Username" and "Password". We can reset your "username" and you can reset your password*.

*Once you're logged in, click on your group name (top right) & it will prompt you to enter your current & new password. On the same screen, if you want e-mail notification when a new study/report is available for viewing – you can fill in the necessary "Personal Information"

You can search by 1) patient name or 2) display your practice's study list.**

**System is set such that a physician within a practice has access to his/her patients as well as the patients' studies ordered by other physicians in the group. (This can be reset if you prefer more restricted access).

Each patient comes with images and reports listed separately.

"SR" after the name designates the report.

"CR, CT, etc" designates the images.

(Requires "Java" to run. If you don't already have Weais (PC) or Osirix (Mac) software on your computer to enable viewing of DICOM images, it will prompt you to download this software).

Any questions, please feel free to call (203-481-5397) or e mail Dawn Fries (dlfries@radiologygroupct.com) or Dr. Milici (Lpmilici@radiologygroupct.com)
